Address: Amin Line, Near New Town Police Station, Koraput, Odisha – 764020, India

Professional Summary

Experienced in on-site operations, team leadership, and project execution, with a growing specialization in full-stack web development. Skilled in resource planning, issue resolution, and process optimization. Actively transitioned into the tech domain, focusing on building scalable applications and AI-based tools. Proven ability to self-learn, lead, and deliver impact across multiple domains.

Professional Experience

TULIP Intern – H&UD Department, Govt. of Odisha
Koraput Municipality | Dec 2022 – Dec 2024

- Oversaw sanitation operations, ensuring health compliance and visible improvement in cleanliness across zones.
 - Operated and maintained the Wealth Centre, resolving technical issues and improving waste collection efficiency by 15%.
 - Acted as an on-site coordinator, providing real-time solutions during sanitation and collection challenges.
 - Boosted organic compost sales by 10% through inter-departmental collaboration and community engagement.
-

Technical Projects

AI-Powered Cultural and Travel Guide

A full-stack travel planner and guide leveraging AI to deliver personalized itineraries, local cultural insights, and optimized travel routes.

- Tech Stack: React.js, Node.js, MongoDB, Open AI, Gen-AI
- Features: Smart AI chatbot, real-time recommendations, itinerary export (PDF), admin panel, image recognition, and route optimization.
- Role: Full-stack developer – built custom backend APIs, integrated AI logic, implemented secure-auth, and deployed app on cloud platforms.

ProFile-AI

A resume analyzer tool using OpenAI APIs to generate job-specific cover letters and assess ATS compatibility.

- Tech Stack: Next.js, Node.js, Supabase, OpenAI
- Key Features: Resume parsing, PDF processing, personalized recommendations, and secure storage.

Ape Authentication System

A secure authentication system with role-based access and session control.

- Tech Stack: Next.js, Node.js, JWT
- Key Features: User registration/login, persistent session management, and OAuth integration.

Kanban Board

A real-time task management application supporting user authentication, drag-and-drop interface, and task filtering.

- Tech Stack: React.js, Node.js, MongoDB
 - Key Features: Dynamic UI updates, task CRUD operations, and real-time status tracking.
-
